PERSONAL SUMMARY

Aspiring Product Designer with experience in UI/UX design and frontend development. I enjoy solving user problems through research, structure, and clean interface design. My goal is to create digital experiences that are simple, usable, and visually strong while continuing to grow through real-world projects and team collaboration.

EXPERIENCE

Freelance Web UI Designer — Bangkok, Thailand

2024 - 2025

UI Designer (Freelance)

- Designed user-centered interfaces based on user flows and usability principles and portfolio-style websites using Figma
- Created clean page sections and reusable UI patterns for consistent layout structure
- Iterated based on client feedback and delivered developer-ready design files

MBC Software Development Company — Yangon, Myanmar

2023 - 24

UI Designer / Junior Frontend Developer (Intern → Full-Time)

- Designed web UI layouts and high-fidelity screens in Figma, focusing on hierarchy and consistency
 - Developed a company portfolio website using React and responsive reusable components
 - Updated existing UI designs based on stakeholder feedback and supported design handoff with developers
 - Designed mobile UI screens for client projects and internal concepts
-

EDUCATION

Siam University — Bangkok, Thailand

2024 – Present

Bachelor of Information Technology

Twinkle University

2021 - 2022

NCC Level 4 Diploma in Computing

PROJECTS

Gatherly — Group Dinner Planning App (UI/UX Case Study) | Figma

- Designed Gatherly app to simplify group dinner planning by reducing coordination friction through clear task flows and shared decision-making UI.
- Completed full UX process: empathy map, personas, journey map, sitemap, user flow, task flow, and low-fi wireframes
- Produced high-fi UI, interactive prototype, and basic design system for consistent components
